# DELTA®-FASSADE COLOR

A versatile solution with coloured surface

## DELTA®-FASSADE COLOR – the essentials in brief

<b>Material</b>	Highly tear-resistant polyester fabric with watertight synthetic coating and adhesive zones on both edges
<b>Suitability</b>	Coloured, breathable façade membrane for cladding with joints up to 50 mm in width that make up a max. of 50% of the surface area. The max. transmission of UV radiation through glass cladding must not exceed 10%
<b>Mass per unit area</b>	approx. 300 g/m <sup>2</sup>
<b>Thickness</b>	approx. 0.60 mm
<b>Watertightness</b>	Watertight W1
<b>Tear strength</b>	370/270 N/5 cm
<b>Flammability class</b>	European fire class B-s1,d0 (EN 13501-1); VKF RF2 (5.2) (VKF = Swiss Cantonal Fire Insurance Association)
<b>S<sub>d</sub>-value</b>	approx. 0.02 m (high level of breathability)
<b>Thermal stability</b>	-40 °C to +120 °C
<b>Roll weight</b>	approx. 13.5 kg
<b>Roll dimensions</b>	30 m × 1.50 m
<b>Available colours</b>	○ ● ● ● ● ● ● ●

DELTA®-FAS PAINT

DELTA®-FAS CORNER

DELTA®-FLEXX-BAND

DELTA®-FAS BAND CLEAR

### Advantages at a glance

- DELTA®-FASSADE COLOR meets specifications of the European fire class B-s1, d0. This is the highest class of flame-resistant sheets, which means the sheets do not drip and produce only low levels of smoke in the event of a fire.
- Offers the highest level of UV protection.
- Highly attractive and flexible thanks to seven standard colour tones: agate white, onyx black, pearl grey, topaz blue, emerald green, coral red, amber orange (further special colours on request).
- Colour-fast: Ensuring long-term colour fastness, the utilized inorganic pigments have been used in construction paints for decades.
- All-round moisture protection thanks to a special watertight coating and breathable DELTA®-AMS technology.
- Easy to lay thanks to adhesive zones on both edges.
- Extremely temperature- and weather-resistant.
- Thanks to the lotus effect beads of water run off particularly well, so rainwater can drain away extremely quickly.
- It is possible to combine façade claddings and colours in the online simulator to gain a first impression of their creative design effect:

### DELTA®-FASSADE COLOR – permanently reliable safety:

Resistant to driving rain

Watertight

Facilitates windtight constructions

Highest level of UV protection

With lotus effect

Breathable – releases moisture

Long-term protection against ageing

flame-resistant
